The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).  - Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).  Status						
1) Responsive to communication(s) filed on 08 h	<u>March 2001</u> .					
2a)☐ This action is <b>FINAL</b> . 2b)⊠ Th	is action is non-final.					
3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.						
Disposition of Claims	Ex parte Quayle, 1905 C.D. 11,	100 O.G. 210.				
4)⊠ Claim(s) <u>1-26</u> is/are pending in the application.						
4a) Of the above claim(s) is/are withdrawn from consideration.						
5) Claim(s) is/are allowed.						
6)⊠ Claim(s) <u>1-26</u> is/are rejected.						
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/or election requirement.						
Application Papers						
9) The specification is objected to by the Examiner.						
10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner.						
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  11) The proposed drawing correction filed on is: a) approved b) disapproved by the Examiner.						
If approved, corrected drawings are required in reply to this Office action.						
12) ☐ The oath or declaration is objected to by the Examiner.						
Priority under 35 U.S.C. §§ 119 and 120						
13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).						
a) ☐ All b) ☐ Some * c) ☐ None of:						
1. Certified copies of the priority documents have been received.						
2. Certified copies of the priority documents have been received in Application No						
Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  * See the attached detailed Office action for a list of the certified copies not received.						
14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).						
a) ☐ The translation of the foreign language provisional application has been received. 15)☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

#### **DETAILED ACTION**

### Specification

1. The abstract is objected since it exceeds 150 words.

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

## Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 7, 12, and 16 is rejected under 35 U.S.C. 102(b) as being anticipated by Gase et al (Gase", USP 5580177).

Regarding claims 7, 12, and 16, Gase teaches an operating system for managing data in a computer, comprising the generating a GUI for a printer for interfacing between a host processor of the computer and a user (col 2, lines 36-38); a data module containing an operating code for causing the printer to execute a predetermined action responsive to a computer command initiated at the GUI (Fig. 2; col 4, lines 57-59); and a conflict dialog module coupled to the data module and having a list of conflicts, the data module causing the conflict dialog module to generate a conflict from

Application/Control Number: 09/802,577

Art Unit: 2173

the list of conflicts responsive to a selected predetermined action to be executed by the host processor (col 5, lines 27-51).

# Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claims 1-6, 8-11, 13-15, and 16-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gase et al ("Gase", USP 5580177) and Hamilton et al ("Hamilton", USP 5950001).

Regarding claims 1 and 20, Gase teaches an operating system for managing data in a computer, comprising the generating a GUI for a printer for interfacing between a host processor of the computer and a user (col 2, lines 36-38); a data module containing an operating code for causing the host processor to execute a predetermined action responsive to a computer command initiated at the GUI (Fig. 2; col 4, lines 57-59); and a conflict dialog module coupled to the data module and having a list of conflicts, the data module causing the conflict dialog module to generate a conflict from the list of conflicts responsive to a selected predetermined action to be executed by the host processor (col 5, lines 27-51). Gase does not teach that the modification does not affect the list of conflicts. However, such feature is known in the art as taught by Hamilton. Hamilton teaches a method for customizing a software

Art Unit: 2173

component which comprises the modifying the GUI (customizing) does not affect the software components (col 5, lines 62-65; col 6, lines 22-24). It would have been obvious to one of ordinary skill in the art, having the teaching of Gase and Hamilton before him at the time the invention was made, to modify the printing interface taught by Gase to include independence operation between the GUI and software components taught by Hamilton with the motivation being to enable independence in modification between the GUI and software components.

Regarding claims 2-4, 8-11, 13-15, 17-19, 21-24, in Hamilton, customization is generated separately, therefore, modification of one component does not affected other components (col 5, lines 58-65).

Regarding claim 5, Gase teaches at least one peripheral device 18 is coupled to the host processor 32 (Fig. 1).

Regarding claims 6 and 25, Gase teaches that the one peripheral device is a printer 18 (Fig. 1).

Regarding claim 26, Gase and Hamilton do not teach that the device is a copy machine. However, since both printer and copy machine are used in reproduction environment, it would have been obvious for one of ordinary skill in the art to apply Gase and Hamilton's method in a copy machine with the motivation being to apply the use of independent modification in a copy machine.

6. The prior art made of record on form PTO-892 and not relied upon is considered pertinent to applicant's disclosure. Applicant is required under 37 C.F.R. § 1.111(c) to consider these references fully when responding to this action. The documents cited therein teach about printing system which relates to the claimed invention.

Application/Control Number: 09/802,577

Art Unit: 2173

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kieu D. Vu whose telephone number is (703-605-1232). The examiner can normally be reached on Mon - Thu from 7:00AM to 3:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Cabeca, can be reached on (703- 308-3116).

The fax phone numbers for the organization where this application or proceeding is assigned are as follows:

(703)-746-7238 (After Final Communication)

or

(703)-746-7239 (Official Communications)

(703)-746-7240 (For Status Inquiries, draft communication)

and / or:

(703)-746-5639 (use this FAX #, only after approval by Examiner, for

"INFORMAL" or "DRAFT" communication. Examiners may request that a formal paper / amendment be faxed directly to them on occasions)

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703-305-3900).
